Large Sparse Matrix Computations

Wenwei Lin

1. Introduction part 1
2. Introduction part 2
3. Introduction part 3
4. Introduction part 4
5. Introduction part 5
6. Numerical Methods for Solving Linear Systems part 1
7. Numerical Methods for Solving Linear Systems part 2
8. Numerical Methods for Solving Linear Systems part 3
9. Perron-Frobenius Theorem part 1
10. Perron-Frobenius Theorem part 2
11. Orthogonalization and Least Square Method part 1
12. Orthogonalization and Least Square Method part 2
13. Orthogonalization and Least Square Method part 3
14. Iterative Methods for Large-sparse Linear System part 1
15. Iterative Methods for Large-sparse Linear System part 2
16. Iterative Methods for Large-sparse Linear System part 3
17. Iterative Methods for Large-sparse Linear System part 4
18. Iterative Methods for Large-sparse Linear System part 5
19. Conjugate Gradient Method part 1
20. Conjugate Gradient Method part 2
21. Conjugate Gradient Method part 3
22. Conjugate Gradient Method part 4
23. Conjugate Gradient Method part 5

24. Conjugate Gradient Method part 6
25. Conjugate Gradient Method part 7
26. Conjugate Gradient Method part 8
27. Conjugate Gradient Method part 9
28. Conjugate Gradient Method part 10
29. Eigenvalue Problems part 1
30. Eigenvalue Problems part 2
31. Eigenvalue Problems part 3
32. Eigenvalue Problems part 4
33. Eigenvalue Problems part 5
34. QR algorithm part 1
35. QR algorithm part 2
36. QR algorithm part 3
37. QR algorithm part 4
38. Symmetric Eigenvalue Problems Perturbation Theory part 1
39. Symmetric Eigenvalue Problems Perturbation Theory-part 2
40. Symmetric Eigenvalue Problems Perturbation Theory-part 3
41. Symmetric Eigenvalue Problems Perturbation Theory-part 4
42. QR- algorithm for solving symmetric Eigenvalue problem
43. Lanczos Method part 1
44. Lanczos Method part 2
45. Lanczos Method part 3
46. Lanczos Method part 4
47. Krylov-Schur Method
48. Jacobi-Davidson Method part 1

49. Jacobi-Davidson Method part 2
