Partial Differential Equations

Zachary Kilpatrick

1. Syllabus
2. Warm Up on Transport Eqn
3. Main Questions
4. Notation Transport Eqn Solns
5. Question about Transport Equation
6. Linear Transport Waves
7. Well-Posedness Uniqueness
8. Well-Posedness Continuous Dependence
9. Classifying 2nd Order PDE
10. Balance Laws 1
11. Balance Laws 2
12. Transport Eqn Ex
13. Warm Up Implicit Fn Thm
14. Transport Eqn Characteristics
15. Method of Characteristics Motivation
16. QA
17. General Method of Characteristics
18. Method of Chars Ex. 1
19. Method of Chars Ex.2
20. Method of Chars Ex.2
21. Shocks
22. Wave Eqn Characteristics
23. Derive Wave Eqn from String

24. Meth of Chars Ex 3

25. Wave Eqn String Derivation Ctd

26. d'Alembert's Formula

27. Continuous Dependence of Solns to Wave Eqn

28. Support Domain of Dependence

29. Wave Eqn in Quarter Plane

30. Conservation of Energy Wave Equation

31. Uniqueness Wave Equation

32. Duhamel's Principle

33. HW Questions

34. Duhamel's Principle

35. Duhamel's Summary

36. Waves in Higher Dimensions

37. Waves in n-dimensions Euler-Poisson-Darboux Equation

38. Wave Eqn Summary

39. Heat Eqn Intro

40. Radially Symmetric Wave Soln

41. Wave Soln Jump Discontinuity

42. Waves in $\mathbb{R}^3$ Problem

43. Self Similar ODE

44. Heat Eqn Fundamental Soln

45. Properties of Fundamental Soln

46. Heat Soln Properties

47. Heat Soln Delta Fn Property

48. Heat Soln Remarks

49. Wave Eqn Soln Properties
50. Heat Soln Recap
51. Heat Soln Uniqueness Bdd Domain
52. Heat Soln Uniqueness on $\mathbb{R}$ and in n-dims
53. Heat Quarter Plane Question
54. Duhamel's Principle Question
55. Decaying Diffusion Eqn 1
56. Decaying Diffusion Eqn 2
57. Fourier Transform Definition
58. Fourier Transform Examples
59. Maximum Principle Setup
60. Maximum Principle Remarks
61. Maximum Principle Proof
62. Heat Eqn Continuous Dependence Uniqueness
63. Heat Eqn Inhomogeneous Soln
64. Heat Eqn Uniqueness (wGrowth Condition)
65. Heat Eqn Uniqueness (wo Growth Condition)
66. Separation of Variables Heat Eqn Intro
67. Wave Quarter Plane Domain of Dependence
68. Wave Quarter Plane Solution
69. Wave Quarter Plane Energy
70. Heat Eqn Fourier Series Coeffs
71. Check FS Satisfies PDE
72. Initial Condition Convergence
73. M Test Convergence

74. Heat Eqn Convergence
75. Robin Boundaries Inhomogeneous Heat Eqns
76. Intro to Sturm-Liouville Theory
77. Heat Eqn Robin BCs
78. Implicit Eigenvalue Eqn
79. Roots of Eval Eqn
80. Sturm-Liouville Self Adjointness
81. Sturm-Liouville Eigenvalues
82. L2 convergence
83. Symmetric SL Problems
84. Fourier Series L2 Completeness
85. Gibb's Phenomenon
86. Wave Eqn on an Inhomogeneous String
87. Uniqueness of Solns to Wave Eqn
88. Forced Heat Eqn Setup
89. Solve Forced Heat Eqn Sep of Vars
90. Examples of Laplace's Eqn
91. Symmetries of Laplace's Eqn
92. Laplace Eqn Fundamental Soln
93. Poisson Eqn Fund Soln
94. Poisson Eqn Fund Soln 2
95. Green's ID 1 Warmup
96. Mean Value Property (MVP)
97. MVP ctd and Max Principle
98. Maximum Principle Laplace

99. Bounding and Uniqueness Laplace's Eqn
100. Separation of Variables Laplace's Eqn
101. Deriving the Poisson Kernel
102. Poisson Kernel RemarksIntro to Greens Functions
103. 1D Poisson Equation
104. Greens Function Properties
105. Greens Function Boundaries
106. Test Functions and Distributions
107. Heat Eqn Weak Max Principle Theorem
108. Weak Max Principle Proof
109. Properties of Distributions
110. Shock Waves Rankie-Hugoniot
111. Greens Functions Continued
112. Greens Function Setup
113. Poisson Eqn Greens Function Soln
114. Method of Images
115. Greens Function Real Line
116. Method of Images Unit Ball
117. Laplace Eqn Unit Ball
118. Method of Images Neumann Boundary
119. Poisson Eqn Neumann Boundary
120. Nonlinear Waves Intro
121. Viscous Burgers
122. Inviscid Burgers Shock Solution
123. Greens Fn Problem

124. Viscous Burgers ReviewKdV Eqn Intro

125. KdV Dispersion Relation

126. KdV Soliton Phase Plane

127. Intro to Fishers Eqn

128. Stationary Waves in Fishers Eqn

129. Traveling Waves in Fisher's Eqn

130. Intro to Bistable Eqn

131. Traveling Waves in the Bistable Eqn

132. Bistable Eqn with the Cubic Nonlinearity

133. Sine Gordon Practice Problem
